DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-52 and 64-92 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Neil et al 6,219,653. O'Neil shows computer readable storage medium containing a program element for execution by a CPU, said program element having a) a first program component for causing a computer to deliver first information to a user, the first information prompting the user to enter at the computer information about a rail transportation service for shipment of goods by one or more railcars, b) a second program component for receiving information about a basic pool of railcars, said second program component implementing a filter for filtering the basic pool of railcars based on one or more filtering criteria to produce a filtered pool of railcars, said second program component causing the computer to deliver second information to the user, the second information prompting the user to select at the computer one or more railcars among the filtered pool of railcars for the shipment of goods; c) a third program element for computing a price for the shipment of the goods at least in part on the basis of: i) the rail transportation service; ii) one or more characteristics of the railcars in the filtered pool of railcars selected by the user. O'Neil shows computer readable storage medium as

wherein the delivering of the first information to the user is done by displaying information on a screen. O'Neil shows the user provides the information about the rail transportation service through an input device selected in the group consisting of keyboard, pointing device, touch sensitive surface and speech recognition unit. O'Neil shows the third program component causes the computer to display to the user on the screen the computed price for the shipment of the goods. O'Neil shows the third program component causes generation of an e-mail containing information indicative of the computed price for the shipment of the goods. O'Neil shows the information about the rail transportation service includes information specifying an origin of the shipment. O'Neil shows the information about the rail transportation service includes information specifying a destination of the shipment.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
